Have you answered the call?

One Soldier dies every nine hours. One of your Soldiers could be next. And you will be called upon to show what you are doing to prevent it. The Combat Readiness Center wants to help you answer that call.

Through Composite Risk Management (CRM) and a collection of risk assessment tools, you can lead and influence your Soldiers to make smarter decisions about risk so they can Own the Edge no matter where they are in the fight.

Preventing loss through CRM starts and ends with you.

The moment will come when you will be called on.

How will you answer?

Be an armed force.

What you do right now impacts everyone.

Have you properly armed your force?

You are counting on your leaders to complete the mission. But have you properly armed them with all the tools they need to get the job done?

Composite Risk Management (CRM) is the most effective way to reduce accidents, decrease fatalities, and improve your Soldiers' readiness so they can be more aggressive by making better-informed risk decisions.

CRM takes the Soldier who is on the edge and enables them to Own the Edge no matter where they are in the fight.

Arm your Soldiers with the tools and knowledge they need to succeed.

The choices they learn to make start and end with you.

Help them to make the right ones.

Be an armed force.

What you do right now impacts everyone.
