

Safety Bulletin

Ballistic Eye Protection OIF SB-003

Why we wear Ballistic goggles

Cost of one set of goggles: \$68.00

Cost of the eye sight or life saved by wearing these goggles: Priceless

These soldiers were wearing eye protection during two different IED explosions. They suffered face wounds as a result of the attack, but they will live to fight again because they were wearing ballistic eye protection. Shrapnel is embedded in the lens instead of being embedded in their eyes possibly causing blindness or brain damage.

**BALLISTIC GOGGLES SAVE LIVES
WEAR THEM**
