## Unauthorized Use of Claymore OIF SA-001

- This picture shows a **LIVE** claymore mounted to the bumper of an HMMWV.
- This is not an authorized deployment method.
- We also must ensure that this is not standard TTP.

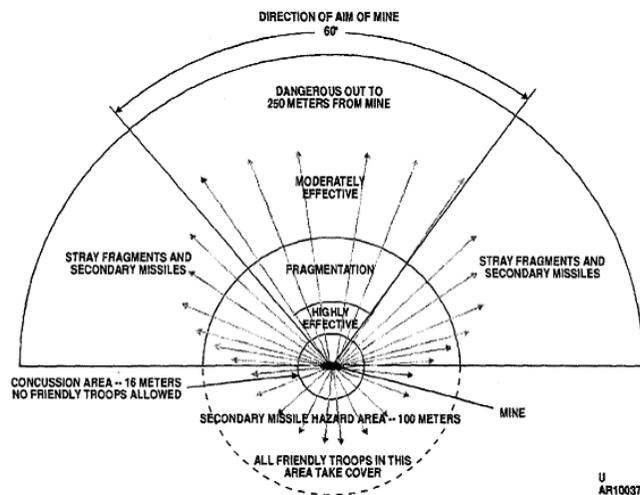

Figure 2-9. Casualty and danger areas of antipersonnel mine M18A1.

2-14

The Claymore has a significant backblast area as detailed above. At a minimum, the blast would disable the vehicle and at worst, kill the vehicle operator and TC as it blasted out the windshield.

MND-B Commander Prohibits Non-Standard Employment of Weapons (FRAGO 107)
