

# GEAR UP!

## SANTA IS WATCHIN' YOU!

### WATCH OUT!

- When you set up the tree, place it away from radiators, stoves or other sources of heat such as lighted candles.
- Watch for faulty wiring or light sets can energize the entire tree, causing a potentially deadly electrical shock or severe burn to individuals coming in contact with it.
- Also keep in mind that some decorative houseplants are poisonous. Keep plants such as holly and mistletoe out of the reach of small children and pets. Ingestion of these plants can be dangerous – possibly even fatal.
