

Question: Which of these is the biggest loss?

ANSWER: All of them.

Loss is loss no matter how you look at it. And every one of these losses makes a unit less ready to complete the mission and takes another Soldier out of the fight.

Composite Risk Management (CRM) is a process that looks at all types of risk, from a Soldier in combat, to accidents during training, to drunk driving when off duty.

CRM enables you to get a clearer, more complete picture of the threat or enemy around you, so you can Own the Edge by making better-informed risk decisions.

So study and apply CRM.

When the moment of decision arrives, this is one test you can't afford to fail.

BEYOND ARMED BEYOND READY

Knowledge changes everything.

Learning from the **past** is the first step to predicting the **future**.

Every loss impacts readiness and takes another Soldier out of the fight. But imagine having the actionable knowledge of the threats or enemy before you cross the line of departure.

Now you can through Composite Risk Management (CRM). CRM enables you to get a clearer, more complete picture of the threat or enemy around you.

With CRM, you can be more aggressive and Own the Edge by making more predictive and better-informed risk decisions.

Lessons from the past can help to shape the future.

Imagine the power now that you can shape yours.
